

## Transportation Security Administration

### **Advance Registration**

[Company X (X)] requests this information in anticipation of the launch of the initial phase of the Registered Traveler (RT) program. X will maintain any information that you provide in accordance with its own business practices, and not under the authority or direction of the Transportation Security Administration (TSA). TSA will not have access to this advance registration information and assumes no responsibility for its collection, maintenance or use by X.

Although X has indicated its intention to be a Service Provider (SP) under the initial phase of TSA's planned RT program, TSA cannot designate X as an authorized Service Provider until TSA fully develops the RT standards and X complies with those standards. Therefore, you should understand that Advance Registration neither guarantees the acceptance of X as an RT Service Provider nor constitutes your application for the RT program.

If TSA later authorizes X to be a Service Provider, X will provide you with a Privacy Act statement, verify your personal information, collect your biometric information, and obtain your written permission before X transmits your personal information to TSA.
